Core skills:
- Experienced with PCB design software such as KiCad.
- Familiar with MATLAB, Simulink tools.
- Good knowledge about VLSI design, Familiar and good at Digital Logic Design, Electronic Devices and Circuits subjects.

MINI PROJECTS:

Title: Detection of Mobile Phone Price Range.

Tools: IBM, Robo flow website.

Project Description:

   By using the dataset from Kaggle, which is about the mobile price ranges, according to the features of a mobile phone, we can easily predict the Mobile Phone Price Range, as per our type requirements with the help of Random Forest Algorithm in IBM Cloud.

Title: Online Chat Box Design

Tools:IBM Cloud

Project Description:

   As per NLP (Natural Language Process), I created a userfriendly Chot Box, which is helpful for now the status of order, helpful in returning the order purpose, and it is useful to communicate at any time, if any issues occur.

Title: QuizApp

Tools: Visual Studio

Project Description:

I developed a basic Quiz App using my knowledge of HTML, CSS, and JavaScript. The app features are multiple-choice questions, tracks the user's score in real-time, and displays the final score at the end of the quiz. The project helped reinforce my understanding of front-end development.
